Lecturer: Dr. Stefania Dinu, Romania

Early Orthodontic Treatment: Managing oral functions and eruption guidance in growing patients | A practical 4-part webinar series on diagnosis, treatment planning, and clinical management

PROGRAM

Online webinar 1 September 28th, 2026 at 18.00-19.00 CEST (UTC+2)

Why Treat Early? Benefits of Early Orthodontic Treatment and Oral Function Management

Learning objective: Understand the rationale for early orthodontic treatment and the role of oral functions in normal dentofacial development.

Topics

- What is early orthodontic treatment?
- Benefits of early treatment for growing patients
- Oral functions and habits:
 - Breathing
 - Tongue posture
 - Oral habits
 - Lip competence
- Managing oral functions with LM-Trainer
- Clinical case examples illustrating the rationale for treatment

Self-study webinar 2

Identifying Suitable Patients for Early Treatment

Learning objective: Learn how to recognize patients who may benefit from treatment with eruption guidance appliances.

Topics

- Scientific background and evidence for eruption guidance
- Clinical indications for treatment
- Patient selection and timing
- Clinical examination and diagnostic protocol
- Common malocclusions suitable for treatment
- Patient case examples and treatment outcomes

Self-study webinar 3

Treatment Planning and Clinical Workflow with LM-Activator

Learning objective: Gain practical knowledge for initiating treatment and selecting the appropriate appliance.

Topics

- From diagnosis to treatment planning
- Defining treatment objectives
- Malocclusion-specific treatment considerations
- Appliance selection and optimal fit
- Wear instructions and patient guidance
- Appliance modifications and clinical adjustments
- Case examples demonstrating treatment planning principles

Online webinar 2 October 19th, 2026 at 18.00-19.00 CEST (UTC+2)

Clinical Management and Integration into Daily Practice

Learning objective: Learn how to monitor treatment progress, improve compliance, and successfully implement early treatment in practice.

Topics

- Monitoring treatment progress
- Follow-up protocols and troubleshooting
- Managing patient motivation and compliance
- Communicating with children and parents
- Clinical case examples demonstrating treatment progression
- Integrating eruption guidance treatment into daily practice
- Treatment fees and practice considerations
- Live Q&A
